

Softub®
BECAUSE SIMPLE IS BETTER

softubcanada.com

6 GREAT REASONS TO OWN A SOFTUB

PORTABLE

Our Softub is so light it can be easily rolled into place. Softub has taken easy installation to a new level, making it the [most portable, full-featured spa in the world](#). You are never limited to one location. Moving? Take it with you. Houseboat? No problem. Installation is so easy and no tools are required. Softub is perfect for outdoor and indoor use and rolls through any standard doorway or gate.

WEATHER RESISTANT

Softub uses marine-grade vinyl to ensure years and years of enjoyment. Bring on the sun, rain, frost and snow. You can enjoy your Softub every day outdoors, anywhere, any season!

ENERGY EFFICIENT

At Softub we developed our Patented Heat Recovery Technology which incorporates the pump motor and heating unit into our single HydroMate system. You can operate your Softub at the temperature you desire for about \$15.00 per month.

EVERYTHING IS INCLUDED

With your purchase, you get the: Softub, HydroMate Power Pak, Sealed High Density Insulated Cover, Security locking straps, Underwater LED Illumination and Therapy Seat (available on our Resort 300 only), your choice of exterior colour and a 5 year Limited Warranty! (the best in the industry)

APPEARANCE

We have to say it, we are good looking! Softub is available in 6 designer exterior colours that complement any decor. Our Softub is hand-crafted and rigorously tested to the highest standards. *Softub isn't just beautiful... it's durable!*

COMFORTABLE

Softub is constructed for unsurpassed comfort. The soft, yet incredibly durable design of the Polybond interior provides comfort for any position. No assigned seating, hard or slippery surfaces or hidden depths. Softub provides the perfect hydrotherapy spa allowing unrestricted movement.

SIMPLE AS 1 2 3

1

ROLL

Weighing 80 pounds or less, even the largest model can be easily rolled through standard doorways, up and down stairs, inside or outside, and across lawns by one person.

2

CONNECT

Simply align the three connectors, turn and tighten. Fill your Softub with water from the garden hose. Plug the included GFCI power cord into any dedicated 15 amp outlet.

3

ENJOY

Enjoy the ultimate luxury of stress-free tranquility, the rejuvenating effects of warm water massage, and the indulgence of soothing your mind, body and soul.

WHY A SOFTUB SHOULD BE YOUR CHOICE FOR HYDROTHERAPY

While it's true that relaxation is a common benefit of spas, your Softub was designed for true, even hydrotherapy. From our jet positioning to the barrier-free seating, Softub provides unrestricted movement for your hydrotherapy routine.

We didn't invent hydrotherapy...we just made it better!

▶ **ARTHRITIS**

- ▶ Warm soak in a Softub relieves the pain of muscle and joint stiffness
- ▶ Improves blood circulation releasing endorphins which is a natural pain reliever
- ▶ Buoyancy of water reduces 90% of body weight, making it easier to move around comfortably

▶ **FIBROMYALGIA**

- ▶ Hydrotherapy is proving to be particularly effective by reducing muscle pain in the ligaments and tendons
- ▶ Improves muscle and joint functions
- ▶ Improves quality of sleep

▶ **ANXIETY AND STRESS REDUCTION**

- ▶ Increased blood flow releases endorphins, improves sense of well-being
- ▶ Overall contentment after a warm water soak
- ▶ Renewed energy and spirit

▶ **DIABETES**

- ▶ Exercising in warm water vastly increases mobility and range of motion
- ▶ Increased blood circulation relieves pain
- ▶ Warm water creates a space for exercise where traditional exercise is difficult

▶ **CHRONIC PAIN CONDITIONS**

- ▶ Natural way to reduce pain and inflammation, can reduce use of pain medications
- ▶ Warm soak relieves muscles and joint stiffness
- ▶ Buoyancy reduces body weight, improves blood circulation, releasing endorphins to naturally decrease pain

▶ **SLEEP DISORDERS**

- ▶ Soaking in hot water before bedtime can ease the transition to a deeper sleep
- ▶ A warm soak before going to bed triggers your body's internal thermostat to lower your body temperature which induces drowsiness so you are more prepared to sleep

FACE THE FACTS

THEM

SITE PREP	Any adequate, load bearing, smooth surface, outdoors or indoors. NO additional costs in preparation.	Construction, excavation, or concrete pad sometimes necessary for permanent location. \$450 average expense.
ELECTRIC	Plugs into any dedicated 15 amp outlet - NO additional costs. Cord-mounted ground fault circuit interrupter (GFCI) included.	Installation of extra amperage or 220V-60Amp line is needed. Additional GFCI purchase may be required. 50Amp up to \$1200 .
INSTALLATION	Simple as 1,2,3 installation and can be done by only one person.	Costly crew, placement, plumbing, electrician costs - Crane sometimes necessary \$200-\$300 delivery fees.
PORTABILITY	Easily rolls through any standard doorway and can be set-up by one person.	Typically requires professional installation, additional expenses and home structural alterations.
RELOCATE	Easily moved from location to location	Usually not practical due to weight and site preparation involved.
THERMAL LID	Included insulated folding lid, that assists in heat retention and efficiency. Convenient combination locking straps to secure spa when not in use. ASTM approved.	May be an optional item with an additional expense. Many come with keys that are inconvenient to use.
JET POWER	Strategically placed, interchangeable hydro-jets for even hydrotherapy.	Hydrotherapy often uneven due to number and configuration of jets.
SAFETY	Constructed from a polyfoam bond, there are no hard slippery surfaces and no hidden depths.	Must use caution with slippery surface, and hard corners. Dangerous hidden depths.
SEATING	Spacious barrier-free seating allows a variety of positions and unrestricted movement for hydrotherapy routines.	Molded, hard plastic, "assigned" seats restrict activity and positioning.
COMFORT	Padded surfaces to surround yourself in cushioned comfort.	Hard surfaces that are just plain uncomfortable.
COLOURS	Available in 6 designer exterior colours.	Limited selection.
CONSTRUCTION	The Softub is made of dense polypropylene foam providing comfort, durability and superb insulating value	Inflatable, punctures easily, poor insulating qualities, short lifespan
ENERGY CONSUMPTION	You can maintain your Softub at your desired water temperature for about \$15.00 per month .	Typically operate for \$40-\$70 or more per month.
SOFTUB ECO-ADVANTAGE	We were green before it was cool. Softub far exceeds stringent compliance requirements set forth by the California Energy Commission as well as National Standards. No harmful VOC's are emitted during the manufacturing process and excess materials are recycled.	Many spa manufacturing methods emit harmful, environmentally-damaging VOC's (Volatile Organic Compounds). Many are constructed of materials that can't be recycled. Numerous spa models struggle to gain compliance from energy regulating agencies.

THE BRAINS BEHIND THE BEAUTY

OVER 35 YEARS OF INNOVATION

HEATS
WITHOUT
A HEATER

THE SOFTUB® HYDROMATE SYSTEM

Our patented heat recovery system utilizes the waste heat generated from the pump motor to heat your spa to your desired temperature. We do this by circulating the water through stainless steel coils that are wrapped around pump housing.

Patented SmartChip® power monitoring system, prevents the pump from turning on if voltage is too low which can cause damage to your pump. Additionally, the SmartChip® will also reset your Softub®, and turn it back on once power levels return to normal.

What does this technology mean for you?

- No expensive, unreliable heater to fail!
- Unsurpassed longevity of your Softub® pump motor, as it is a water-cooled system.
- Plugs into a standard, dedicated 15 amp outlet.
- A 120v spa that can operate both heat and jets simultaneously.
- Unrivalled efficiency. Softub® easily meets and far exceeds the maximum allowed electric usage set by the North American Energy Commission.
- Your Softub® will maintain your desired temperature in all climates year-round.

THE SOFTUB SUCCESS STORY

It all started with our Founder, Tom Thornbury, and a group of engineers in a garage, over 30 years ago. After looking at the other hot tubs available, they created a cost-effective, durable and comfortable spa that incorporated the best features possible.

The uniqueness of our Softub® product has generated a reputation as the Softub® being one of the most energy efficient hot tubs on the market as well as simple to use and maintain. Check out our Google reviews; our customers love their Softub®!

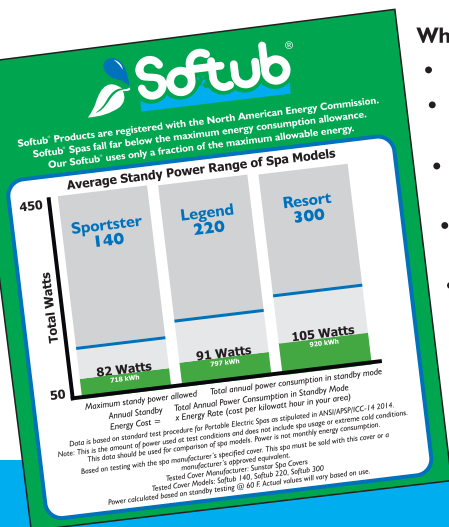

From humble beginnings in a small shop in Los Angeles, CA, Softub® is now a worldwide corporation with factories on both coasts as well as Canada and worldwide distribution in over 30 countries. The main reasons

for the great success of the Softub® product line is the truly unique, break-through product concept and the devotion and diligence of hundreds of talented, dedicated employees, dealers, and distributors. Softub® spas are hand-crafted unlike traditional spas.

Softub® has grown to be one of the most recognized brands in the industry. We continue to be a leader in innovation for portable hot tub design and hold numerous patents with our processes and components that are unmatched by any other.

With the success of Softub® in today's economy, we welcome you to join the Softub® family of satisfied customers, over 300,000 worldwide.

Happy Tubbing!

**Softub® uses only a fraction of
the maximum allowed energy!**
